

Flip Robo Technology

ASSIGNMENT – 39

Question 1:

Answer: Least Square Error

Question 2

Answer: Linear Regression is sensitive to outliers

Question 3

Answer: Negative

Question 4

Answer: Correlation

Question 5

Answer: Low bias and high variance

Question 6

Answer: Predictive modal

Question 7

Answer: Regularization

Question 8

Answer: SMOTE

Question 9

Answer: TPR and FPR

Question 10

Answer: False

Question 11

Answer: Apply PCA to project high dimensional data

Question 12

Answer: All Are True

Answer 13: Regularizations are techniques used to reduce the error by fitting a function appropriately on the given training set and avoid overfitting

Answer14: Ridge Regression and LASSO

Answer15: The error term of a regression equation represents all of the variation in the dependent variable *not* explained by the weighted independent variables.
